

MARK YOUR OWN

SAFE ZONE

SEARCH

MARKER

With the **searchmarker**, a safe area with explosive threat (IED/UXO/ERW) can be marked both day and night. Thanks to a multifunctional design, the marker can be used in a variety of environments and conditions. The supplied set of searchmarkers consists

of 10 blocks and is intended for an individual within a team responsible for activities related to Military Search, exploration and/or mine countermeasures. By means of the encodings on the markers, threats and/or safe areas/paths can be indicated.

**TECHNICAL SPECIFICATIONS** Dimensions 40 x 40 x 10 mm (l x w x h), weight: 10 grams. • Material anti-static Polypropylene with four holes of  $\varnothing 7$  mm. (with the possibility to raise the marker in terrain with a lot of vegetation using rope, elastic or tie-rop) • 2 colours (in accordance with NATO and mine action color coding); Red = threat, White = safe • Provided with 2 reflective stickers: Red with black cross, symbol threat (IED/UXO/ERW); White with black arrow, symbol safe path • Symbols visible at night using IR light from brightness amplifiers • Markers reflect using white light • Search markers feature engraved SAP number in the white side of the search marker.
